DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 3/2/2009 has been entered.

Response to Arguments

- 2. Applicants' arguments, filed 3/2/2009 and 4/28/2009, have been fully considered but they are not deemed to be persuasive. Rejections and/or objections not reiterated from previous office actions are hereby withdrawn. The following rejections and/or objections are either reiterated or newly applied. They constitute the complete set presently being applied to the instant application.
- Applicant's arguments with respect to the rejection of claims 1-2 under 35 USC
 102 have been fully considered but they are not persuasive:

Claims 1-2 are rejected under 35 U.S.C. 102(b) as being anticipated by Virgolini et al. ("Beneficial effect of long-term PCE1-treatment in left ventricular heart failure"; 1989; Prostaglandins, Leukotrienes, and Essential Fatty Acids; 38(3): 177-80).

Applicant's arguments do not comply with 37 CFR 1.111(c) because they do not clearly point out the patentable novelty which he or she thinks the claims present in view Application/Control Number: 10/520,771

of the state of the art disclosed by the references cited or the objections made. Further, they do not show how the amendments avoid such references or objections.

Applicant only states that "the independent claims patentably define the present invention over the citations of record...[and that]...the dependent claims should also be allowable for the same reasons as their respective base claims and further due to the additional features that they recite" (p. 2 of Reply filed 3/2/2009), without pointing out any novelty over the references of record. Additionally, no amendments to the claims have been made.

The rejection is therefore maintained for the reasons of record.

Applicant's arguments with respect to the rejection of claims 1-2 and 14-15 under
 USC 102 have been fully considered but they are not persuasive:

Claims 1-2, 14-15 are rejected under 35 U.S.C. 102(b) as being anticipated by Stanek et al. ("Dose-effect relationships of prostaglandin E1 in severe endstage chronic heart failure"; 1997 Jan; Jpn. Heart J.; 38(1): 53-65).

Applicant's arguments do not comply with 37 CFR 1.111(c) because they do not clearly point out the patentable novelty which he or she thinks the claims present in view of the state of the art disclosed by the references cited or the objections made. Further, they do not show how the amendments avoid such references or objections.

Applicant only states that "the independent claims patentably define the present invention over the citations of record...[and that]...the dependent claims should also be allowable for the same reasons as their respective base claims and further due to the additional features that they recite" (p. 2 of Reply filed 3/2/2009), without pointing out

any novelty over the references of record. Additionally, no amendments to the claims have been made.

The rejection is therefore maintained for the reasons of record.

Conclusion

- 5. No claim is allowed.
- 6. All claims are drawn to the same invention claimed in the application prior to the entry of the submission under 37 CFR 1.114 and could have been finally rejected on the grounds and art of record in the next Office action if they had been entered in the application prior to entry under 37 CFR 1.114. Accordingly, THIS ACTION IS MADE FINAL even though it is a first action after the filling of a request for continued examination and the submission under 37 CFR 1.114. See MPEP § 706.07(b). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
